Please confirm your e-mail by clicking link below.

Thanks,
The Token Fund

Confirm your email address by pressing the button in the email we send you.

3

You need ETH wallet

Before get tokens you need to setup you ETH wallet address.

Generate wallet

Add existent wallet

Apply promo-code

On thetoken.io/dashboard generate a new address for future storing of TKN tokens.

Generate wallet

After generating wallet you need to **BACKUP IT**
Backup this! You can not get access to your tokens without seed and password!

Wallet seed (generated):

behind detect maximum baby eagle square foam foam enjoy leisure include derive

Backup this! You can not get access to your tokens without seed!

Wallet password:

Use at least 12 characters.

Generate

During address generation on our website we strongly urge you to save and backup all passwords and 12-words mnemonic seed-phrase especially.

OR

3 **You need ETH wallet**
 Before get tokens you need to setup you ETH wallet address.

Generate wallet Add existent wallet Apply promo-code

On thetoken.io/dashboard you can add your own existing ETH address.

Add own wallet

- I confirm that I have control over private keys of this address
- I confirm that this address belongs to me and not any other person or organisation
- I confirm that I have stored backup of this wallet
- I have protected private keys enough

Wallet address:

You confirm that you have got access to private keys

Add

If you add your existing address, it is critically important that you possess the corresponding private key for this address. It is forbidden to use an address from exchanges or web-based wallet services.

The screenshot shows the 'THE TOKEN FUND' dashboard. At the top, there are navigation links: HOME, GET TKN, REDEEM TKN, WHITE PAPER, and MARK@THETOKEN.IO. A blue circle with the number '4' highlights the 'Get tokens' section. This section contains a warning: 'Warning! We charge 5 % fee for The Token Fund team. More info in the White Paper.' Below this are two address sections: 'BTC address' with the address '194ZZ9kTYstycetexJXHi2qq8unr19QyubM' and 'ETH address' with the address '0xdd0180cdb3e10cfb2fd586963a21b817e7164493'. Each address section has 'Copy' and 'Show QR code' buttons. To the right, the 'Current TKN token price' section shows '1 TKN = 0.012214 BTC' and '1 TKN = 0.148854 ETH', updated on 24 July 2017 10:16.

After you successfully create or add a new ETH address, the deposit addresses for BTC and ETH will appear on the thetoken.io/dashboard/tokens page.

Now you can send BTC/ETH to corresponding deposit addresses. It is possible to make a transaction to these addresses from anywhere (exchanges, stock markets, etc.) but we recommend you to use your own cryptocurrency wallet in order to easily make a return of your funds in course of any abnormal situations.

IMPORTANT These addresses should be used for the initial deposit **only**. If you decide to make further investments in the future, you should check your personal area (dashboard) for the relevant addresses.

TKN tokens automatically issued to your active ETH wallet after you replenish a deposit address. Usually it takes up to 30 minutes until the tokens arrive into your active wallet from the moment of deposit transaction. Potential delays may occur due to overloading in BTC or ETH networks (e.g. during active third-party ICO on Ethereum platform), and insufficient fee for transactions can cause a delays.

Tokens issuing procedure starts after 3 confirmations for BTC deposit and 12 for ETH. You can always track a number of confirmations for your transaction on third-party block-explorers (bitaps.com, blockr.io, etherscan.io)
